

# HBARSUITE

## Pitch Deck

01

Hsuite

# Problems

- **Security vulnerabilities in Smart Contracts**
- **High development costs, operations and onboarding in Web3**

# Solution

- **Smart-Node technology built on Hedera, cheapest, faster, greener and securer**
- **Simple SDK in Typescript and other common used languages**

# Market Opportunity

- Polygon deploys in average more than 80K Smart-Contracts daily
- 200k solidity developers (US\$68.00/h) against Typescript with 11M (USD\$ 56.00/h)

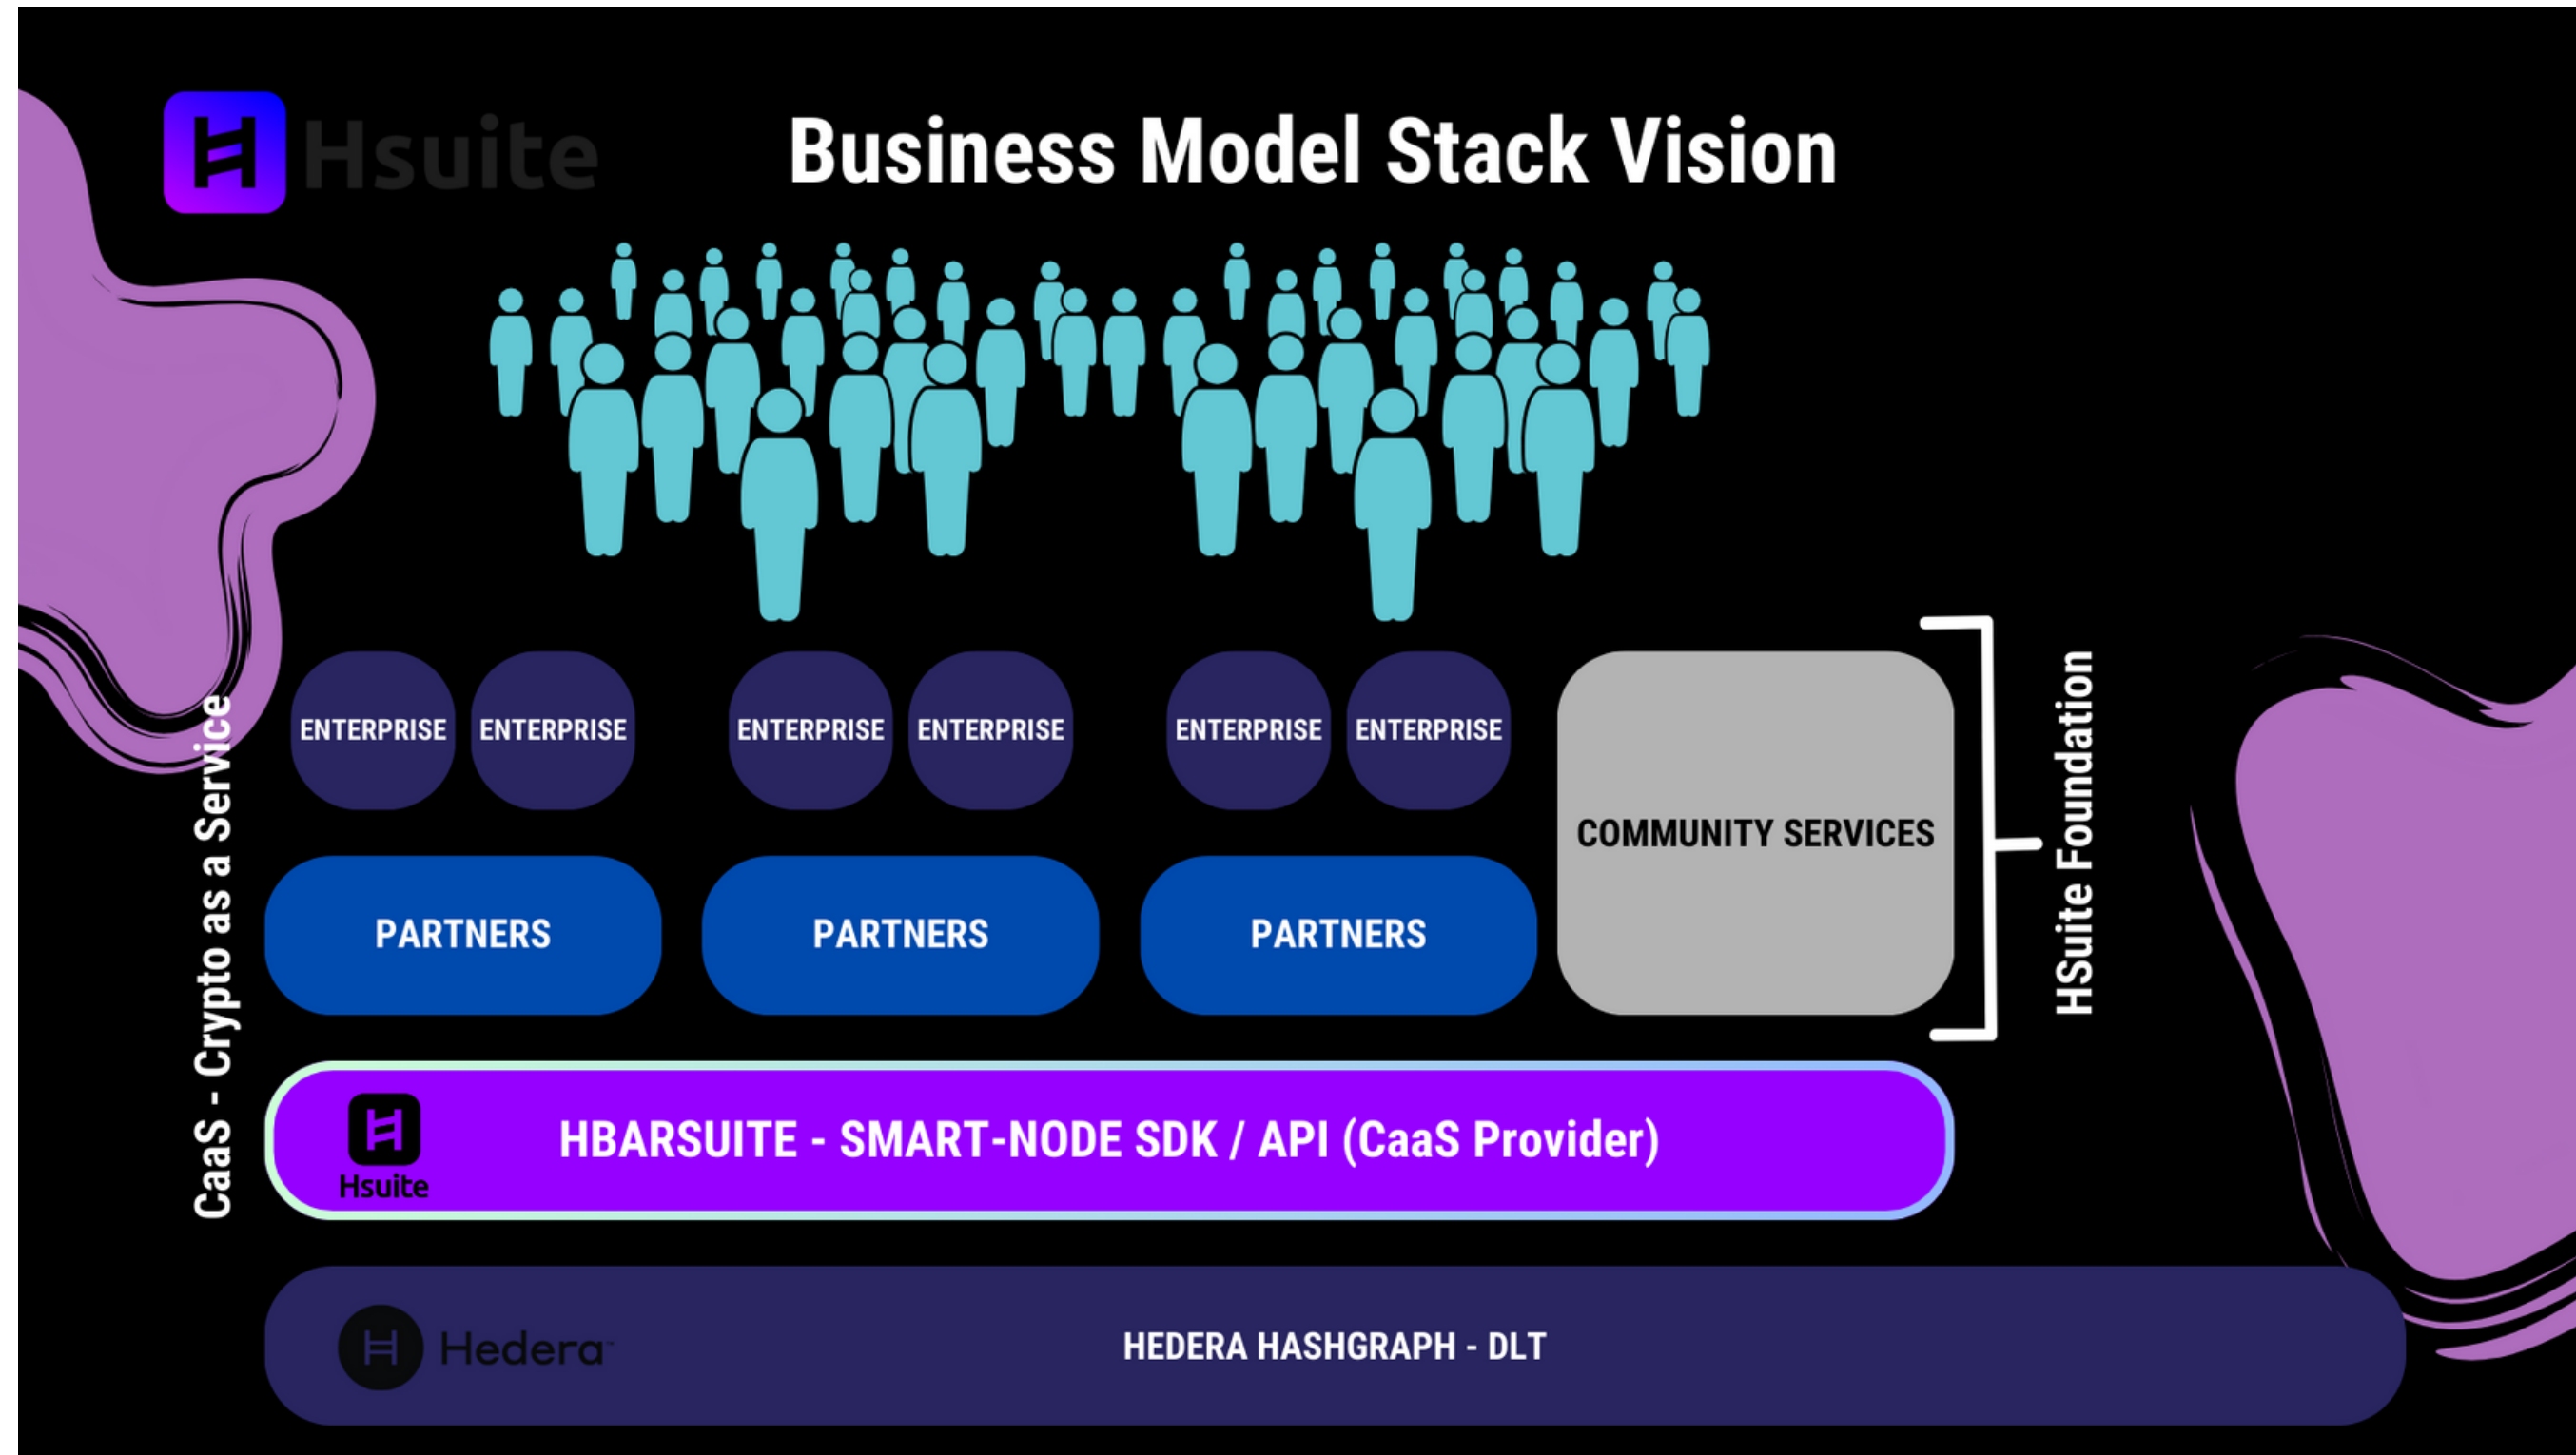

# Business Model

- **B2B: Offers technology and services to link Web2 to Web3 businesses, generating revenue through subscriptions, transaction fees, and on-demand development.**
- **B2C: Offers infrastructure for developers to create web3 dApps, with revenue from subscriptions and fees.**

- Total Max Supply: 50 billions
- Circulating Supply: 6 billions
- Liquidity Pools (own Dex):
- Treasury:
- OTC Deals: 11 billions

HbarSuite (HSUITE)	
Total Value Locked	
✓ \$4.49m	
Chain Breakdown	
Hedera	\$4.49m
Market Cap	\$14.89m
✓ HSUITE Price	\$0.0014
All Time High (3/10/2024)	\$0.0034
All Time Low (2/2/2023)	\$0.0001
Fully Diluted Valuation	\$70.24m
✓ 24h HSUITE Volume	\$90,430
DEX Volume	\$90,593 (100.2%)
✓ Volume 24h	\$54,801
Cumulative Volume	\$83.75m

# Tokenomics

11

# Competitive Analysis

- **Only Layer 2 Network on Hedera**
- **Cheaper transaction between all major networks and Dexes**
-

# Community

12

- **X followers: 11.2k**
- **Discord: 1.9k**
- **More statistics like messages, users grow on X etc.**

# Risks and Challenges

13

- **Market the new concept**
- **Grow the Team**
-

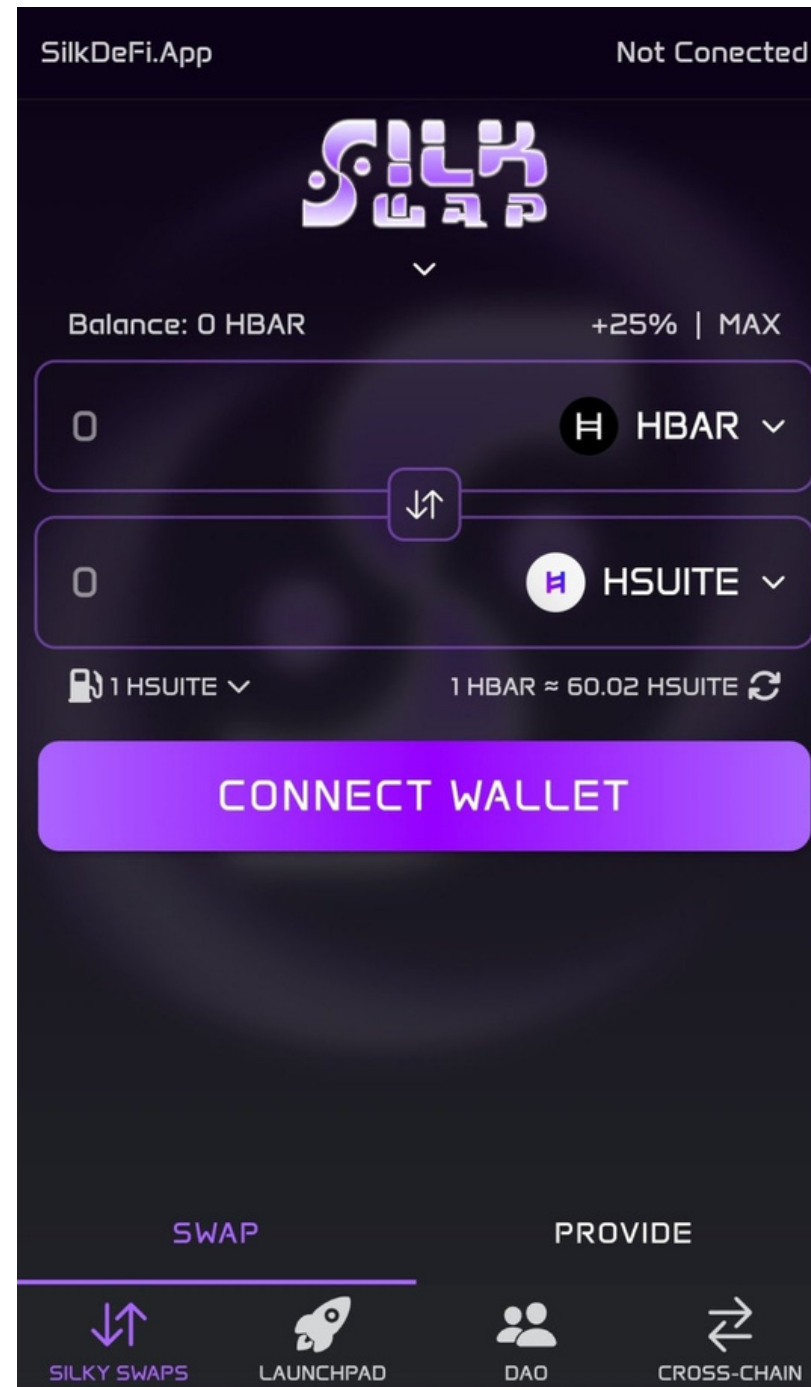

# Financial Projections

- Number investment
